Your Culture Should Be Showing

Everyone needs a garden. The housewife to break the dull monotony of her household chores; the husband to relieve accumulated tensions of the daily grind; old folks because gardening is a pleasant and gentle form of exercise; young people because it is educational and interesting. There is something subtly soothing in the physical activity and mental relaxation of working with growing plants and with the soil. It's a basic urge derived from thousands of years of man's ancestry. From the moment primitive man tired of his nomadic existence in the hunt for animals and other wild foods with which to satisfy his hunger, he became a tiller of the soil.

While it is no longer necessary for everyone to grow foodstuffs, it is necessary that we give release to that psychological need for communing with nature and the modern way to do it is to "say it with flowers."

Gardening, too, can be creative. We can paint living pictures and surround ourselves with beauty. It's a challenge to transform a bare lot into lovely vistas. Those impressive suburban homes with picture windows and spacious yards—how that space does cry out for the treatment that could convert it into an appropriate and beautiful setting with window pictures for the picture windows.

Included in such a project is the need for flowering plants and newcomers to gardening will be astonished with the beautiful transformation and comparative ease of its accomplishment by the use of generous plantings of iris and daylilies.

This is our 16th annual catalog and our appreciation to the customers who have made each year a gain over the preceding one is deep and sincere. As in the past, we shall continue to offer ever more beautiful varieties for the money you invest and to avoid disappointing you with plants unadapted to your growing conditions or lacking in vigor. You, who have had experience, know how simple it is to order plants by mail, freshly dug and quickly delivered from our central location. You know, also, that the varieties we offer are seldom available otherwise except from the few dealers who specialize in these flowers. Only the specialist can keep abreast of hybridizing progress.

Should it be convenient for you to visit Edenwald Gardens during the blooming season or at any other time, you are always cordially welcome. Iris bloom is normally at its peak May 15-20; daylilies about the second week in July. Our location is on State Road 67, two miles north of Vincennes.

Thanking you again for your patronage, your kindness in recommending us to others and for the many "love letters" you wrote, we remain

Sincerely yours,
the Busses,
Edith, Walter and John

SPECIAL OFFER To New Customers

WHO ORDER OTHER THAN COLLECTIONS

We want you for our customer! If you will send us that first order we are confident that you will buy from us regularly, and tell your friends about us too.

So, if you have not tried Edenwald plants, send us at least a \$3.50 order, *not including Collections*, and we will add, as a free extra, one of the following \$1.00 irises: Cascade Splendor, Dark Mood, Lady Mohr, Masked Ball, Pink Seedling, Pink Talcum, Ranger or Solid Mahogany.

Should your order consist of daylilies, you may wish to receive one of the following daylilies instead: Amulet, Caballero, Canari, Gay Troubadour, Hesperus, Minuet, Painted Lady or Piquante.

Please state your preference and remember—your order must be not less than \$3.50 not counting Collections. The latter are too heavily discounted to qualify for any additional premium.

If your first order amounts to \$10.00 or more, exclusive of Collections, you may select three of the gift plants above.

SPECIAL OFFER To Former Customers

It has been our custom to include free extra plants with orders both as a token of our appreciation and to make sure the customer receives full and generous value. If the variety so included is already among the customer's collection the gift is pointless and disappointing to both customer and ourselves. For this reason we prefer to privilege the customer to select extras of his own choice in the amount of ten percent of the order (ten cents for each dollar ordered), Collections excluded. New customers may avail themselves of this offer instead of the free iris offered above, if preferred, but not both.

Love Letters

"I can't see why DARK MOOD is not listed near the top of 100 Best Iris for it attracts more notice in my garden than many others that are listed. It is beautiful! All the plants I have received from you have been excellent and I recommend Edenwald at every opportunity." SOUTH DAKOTA

"We have sold our former home where you sent the first of your gorgeous iris. My husband wouldn't let me disturb any of the plantings so I left them all behind. Alas! The new owners have cut down all the shrubs and dug and thrown away all my lovely iris and also the 1500 naturalized daffodils. Our new home will be very lovely when all the hard work is over and the new plantings in place. Please send me a new catalog. Only one or two persons in our town, to whom I gave your name and address, had such iris as I had. They were the most beautiful iris I had ever seen and I have grown iris for 36 years." NEW JERSEY

"The iris I bought from you sure were fine. They all bloomed the first year except one. I sure was pleased with them." KANSAS

"Last year I ordered the iris SPOTLIGHT for a friend's birthday. Other friends gave her iris from various other growers. Your SPOTLIGHT was the only one which produced bloom this first season and my friend said it was by far the finest plant she received." GEORGIA

"I have never before spent so enjoyable a vacation as the past week watching all the Edenwald iris burst into bloom. PINK TALCUM is beautiful and ELMOHR is certainly gorgeous. All of them surpassed my expectations. Everything you state in your catalog has proved true and I can honestly say it's a pleasure to do business with you." WISCONSIN

"We visited your gardens earlier this week and it was an unforgettable thrill. We were quite impressed with your own introductions, especially SUNNYSIDE UP and DARK MOOD. As for DARK MOOD it surpassed ELMOHR in size and is a gorgeous color." ILLINOIS

"All the iris I bought of you last year had gorgeous blooms. I got a blue ribbon at the flower show on my HAPPY BIRTHDAY." KENTUCKY

"20,000 people viewed the iris in Kingwood Center. They seemed to go for your EDITH POPE in a big way." OHIO

"Thanks for sending your catalog again after these non-ordering drought years. While we have had very little snow or rain in this part of the state, we shall have water again for irrigation. My watering with buckets of water saved at the kitchen sink paid off. My garden has never been more beautiful than this year but oh my aching back! A hundred feet of perennial border, fifteen feet wide, plus at least another hundred of narrower width took lots of saving but I lost very little except the lawn and now new grass is coming. The iris and hemerocallis ordered from you have all done very well. I used to recommend . . . Gardens but now it's Edenwald." NEW MEXICO

"Both iris and daylilies bloomed spectacularly. I hope, in the near future, to obtain some of the more outstanding varieties but I don't see how any of them could be termed more outstanding than the ACCENT, WABASH and PINK TALCUM that I received, as well as NEW SNOW. I was simply overwhelmed when they bloomed, as were all my neighbors." OKLAHOMA

"Your daylily, THE KINGDOM, bloomed this season and the blooms were large, smooth, sunfast and a fine soft color on wonderfully well branched scapes and a plant with grand dark green foliage. I think this a fine new addition to the better varieties. All this on a plant that was planted just last fall so I'm wondering how much more impressive it will be when established." NEW JERSEY

"I ordered some daylilies from you last fall. The plants were wonderful and large. People tell me I should order from . . . Gardens in my home state but your plants are better. So long as you treat me right I will stick with you." TEXAS

"DARK MOOD is my best seller in the 'blacks' and I intend to get rid of SABLE and other cheaper blacks and sell this one alone as it far outstrips all others in its color class." INDIANA

"We have a small cash-and-carry trade in iris plants. This year we could have sold three times as many pinks as we had available. It may interest you to know that we have bought iris from no one else for something like 15 years." NEW YORK

"The daylilies I received from you are exceptional. They are true to name, stout, healthy and of fine size." MISSISSIPPI

"Just a note to say your PINK TALCUM grew strongly, bloomed well. It was my choice of all pinks I saw pictured and since seeing the blooms it is still my choice. It, as well as CAPTIVATION, MAYTIME, PATHFINDER, CLOUD CASTLE, LEADING LADY and MATTIE GATES, came through 30 below zero weather with only 6 to 12 inches of snow cover and all had two strong bloom stalks. Your plants are still tops with me, for vigorous growth and strong bloom." WISCONSIN

"Last season we ordered the Iris of the Year for 1955 and 1956. Only ELMOHR failed to bloom. The rest were gorgeous with extremely large blooms. We are very well pleased with your plants." PENNSYLVANIA

"Your daylilies arrived in perfect condition. They are nice and I feel sure they will bloom well next summer. We have never had such nice plants before." SOUTH CAROLINA

"Just 12 weeks ago today it was that I received the iris. And yesterday, Oct. 24th, ELEANOR ROOSEVELT burst into bloom. HARVEST BLUE should bloom in a few days. BOUNTIFUL BLUE is pushing up a bud also. They will bloom if it doesn't freeze too soon. I cover them at night with bushel baskets. I think it is just wonderful and my neighbors are all getting enthused too. Many thanks for sending me such nice plants." ILLINOIS

"I didn't count on seeing any blooms the first season after the August planting here in Maine. But all twelve plants bloomed in a mass of beautiful shades of yellow and gold and achieved the effect I didn't expect to see for at least two years. You can be sure that future orders will be from Edenwald." MAINE

"All the iris I received from you in October last year will bloom. HELEN MCGREGOR already has 15 blooms, ROCKET 13, and all the others are full of buds just waiting to burst into bloom. There is no other place on earth to beat that for healthy iris!" LOUISIANA

"I truly was 'tickled pink' with my pink daylily and iris seedlings which I ordered from you. To prove it I want to order 5 more pink iris and 5 pink daylily seedlings." WEST VIRGINIA

"This is my first 'fan letter' but I must compliment you on the quality of your daylily plants. I have ordered many plants but yours certainly excell in every way." MISSOURI

"I saw the blossoms of DARK MOOD in our show here last spring and they were simply 'out of this world!'" KANSAS

"I have spent hours over your catalog and appreciate your honest descriptions as to hardiness, etc.

In spite of a late spring, the cold rains and all, the iris from Edenwald made the garden a place many came to see. DARK MOOD was outstanding. I liked BLUE SHIMMER too, for its peppered pattern and all the two-toned ones for their size and color." MICHIGAN

"I have just called my friend Sam Caldwell, 'The Old Dirt Dobber' of the radio, and asked him if it is too late to plant spuria iris. He highly recommended your garden as a good place to buy. He says he knows you personally and knows your stock is fine." TENNESSEE

"All eight daylilies and eleven iris blossomed. The iris were like gardenias. Everyone raved about them. They were prettier than the catalog pictures. The daylilies were too!" NEW YORK

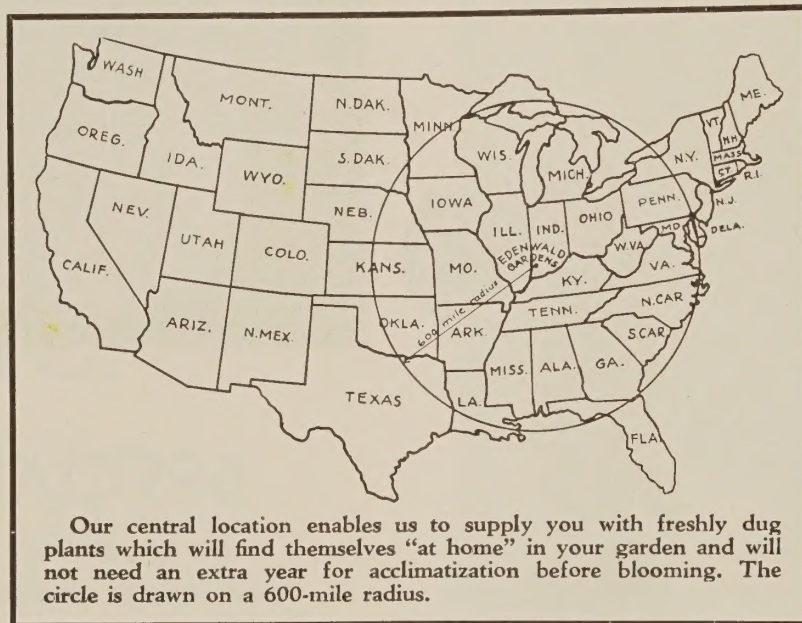

"I fell in love with BENEDICTION. And there's only one other EXTRAVAGANZA among the group of iris growers I know. It doesn't come up to mine. Besides I have given away 3 beautiful rhizomes and still have 5 left—all from the one you sent me free. So it's no wonder I like Edenwald plants." OKLAHOMA

"They really do 'have to be seen to be appreciated.' We enjoyed DARK MOOD, GOLDEN EAGLE, SUMMIT, and ROYAL RUBY daylily for the first time this spring and the rhizomes were the largest and healthiest I've ever had." GEORGIA

"I'm a brand new gardener that didn't even have an old garden plot to begin with but had to stake my beds out of an old corn field where the clay soil bakes so hard in summer it's a never-ending wonder anything will grow. Yet, though I lost some perennials the first winter, all the iris and daylilies received from you are thriving and all the iris have already bloomed. All were breath-takingly lovely and we marveled over the size and beauty. OLA KALA made such a show-stopping display with the red Oriental poppies that I am ordering another to more quickly increase the eye-catching effect." WISCONSIN

"Best iris I ever got came from you. Call it climate or what have you, when I talked about 'good ones' it's always the batch I got from Edenwald." KENTUCKY

"Every daylily we bought last year bloomed very well. We were especially pleased with PAINTED LADY. It was large and impressive. BAGGETTE is also very lovely but ROYAL RUBY was not as bright as the picture in the catalog." ILLINOIS

Edenwald 1958 Introductions

In addition to our own carefully screened candidates for introduction, we exult in the privilege of presenting a few choice offerings in Japanese iris from that master hybridizer of these flowers, W. A. Payne, of Terre Haute, Indiana. Wilmer Flory has some beautiful hemerocallis on the way but they are not ready for 1958 introduction.

IRIS INTRODUCTIONS

BLUALLURE (Buss '58). EM.42". An early blooming blue of medium register that has won increasing approval over a lengthy testing period. The color is nice and the form ruffled and widely flaring, the standards well closed, the substance thick and durable. Yellow beard, tipped blue. Tall of stature with well branched, strong stalks that never go down. Profuse in bloom with large, broad-petaled flowers. A thoroughly good iris which can be introduced at a moderate price because of our conservative policy regarding introductions.\$7.50

HAWAII (Buss '58). EM.40". Here is a large, well formed, luxuriant flower of rosy orchid coloring that starts to bloom quite early and continues in good profusion for a long period. Yellow beard, tipped blue; brownish hafts. Although it looks as though it might have pink breeding, there is no pink (flamingo) in its ancestry. Don't let the low introductory price fool you.\$10.00

Edenwald Introduction Policy: We think too many irises and daylilies are being introduced before they have been given sufficient time for proper evaluation. We know that it is sometimes difficult to hold back a good seedling. Nevertheless, it shall be Edenwald policy, whenever practicable, to hold contemplated introductions a year longer than usual. This extra testing period will also permit a lower introductory price.

DAYLILY INTRODUCTIONS

FAIR FACE (Buss '58). "In all my dreams, your fair face beams." Our old barber-shop quartette would have appreciated the name we chose for this daylily, so charming in its pleasing combination of color pattern and compact triangular form. A bitone, the sepals precisely bordered with a broad pale yellow band surrounding a center brushed with the petal color which is brownish pink. The petals are broad and stiff producing a rather large, firmly built flower of flaring form. Light green throat. July. 3 ft.\$10.00

QUEEN FOR A DAY (Buss '58). Totally resistant to sun damage, this large, pale lemon, crepey textured bloom winds up the hottest day looking morning fresh. Broad petals, moderately recurved and charmingly ruffled. Strong, upstanding scapes. July. 4 ft.\$10.00

SALMON PURE (Buss '58). Large, broad-petaled and very ruffled bright salmon with light green throat. A tall, vigorous midseason bloomer that is at its best on hot, sunny days.\$10.00

JAPANESE IRIS INTRODUCTIONS

It is our great pleasure to present here a few choice introductions of Japanese iris from the hands of W. A. Payne. We regard Mr. Payne as the foremost hybridizer of these plants in America. His efforts have been to produce Japanese iris of superior beauty better adapted to the cultural conditions of the Mid-west. He has been engaged in this pursuit for more than 25 years.

For this year, we are co-introducing with Mr. Payne, the following:

GAYETY (Payne '58). Very large, six-petal, horizontal flower of solid formation, the petals beautifully waved. Prominent halo and radiating veins of amethyst-violet over sanding of pansy-violet. Styles are raisin-purple. Both petals and styles are charmingly accented with white edges. A gay flower of bright rosy coloring on a fine rugged plant with tall stems.\$30.00

THE GREAT MOGUL (Payne '58). Extremely large, three-petal, streamlined, dark red-violet flower with a slight blue-violet halo. A magnificent flower of brilliant color and graceful form poised on a tall, well branched, strong stem. Most outstanding. Midseason. \$35.00

Although Payne Japanese iris have been out of reach, pricewise, for the average gardener, it has been our ambition, ever since we first viewed these hybrids, to be able to offer them at prices any gardener could afford. This ambition is just about to be realized and although our stocks are not yet sufficient we hope, in another year, to be able to offer many of his finest introductions at really down-to-earth prices.

PRIMA BALLERINA (Payne '58). Large, six-petal pink-orchid that closely approaches a true pink self with scarcely any perceptible white or blue tint at the base of the petals, unusual for this color class. Flowers flare widely and are freely produced on 4-ft. stems in early midseason. Plant vigorous.\$22.50

VIOLET LUSTRE (Payne '58). Splendidly formed flower of quite unusual coloring of lavender-violet with darker shadings at the center. Large, six-petaled and ruffled with convex form, blooming midseason to late on tall, well branched stems.\$25.00

We present the following polls for what they are worth without endorsement.

Main Season

Our catalog offerings of BEARDED IRIS are divided into three classifications: the MAIN-SEASON TALLS, the EARLY-BLOOMING INTERMEDIATES, and the EARLIEST-BLOOMING DWARFS.

The following list of carefully selected Tall Bearded Iris is representative of a hundred years of hybridizing effort. And the native species from which these modern hybrids descended were in high favor clear back into antiquity. Accompanying man's march from his earliest beginnings to present-day civilization, the iris has been used by him not only for the adornment of his surroundings but also in the production of powdered perfume for his lady, medicine for his ailments, heraldic emblems for his rulers and symbolic decoration for his grave.

What other perennial can match its range of color? Where else can be found a perennial that can flourish in almost every region of our country and at the same time compare in beauty, size and grace of form, freshness and fragrance of today's iris?

Here is a plant that the most inexperienced gardener can grow to perfection; a plant of stature and vigor that increases in size of clump and production of glamorous flowers year by year; a horticultural dream come true!

Our long list of varieties imposes restraint of description due to limitations of space in our catalog. This we regret because we have the feeling that we have not done justice to these lovely flowers in describing them so inadequately. But on the other hand, we have also tried to avoid confusing you by overstatement. We would rather you found everything finer than we claim.

PLEASE NOTE that if the iris you seek is not found in this alphabetical listing you may find it among the varieties offered in our **SPACE SAVER SALE** on page 19.

SHIPPING SEASON for all bearded iris is July 1st to Nov. 15th.

EXPLANATION: Variety name is followed by the name of the originator and the year of introduction. Season of bloom is indicated by the initials E, M, L, signifying early, midseason or late. Height is given in inches.

Tall Iris

LIST OF TALL BEARDED IRIS

- ACCENT** (Buss '53). M.46". Large, tall and vigorous variegata of distinct and pleasing color. Clean yellow standards of a light medium tone contrast most agreeably with the rose-red falls. - BRITANNIA** (Tompkins '49) ML.38". Large, dark red self of heavy substance. \$2.00
- BROADRIPPLE** (W. E. Buss '52). M.38". Largest and broadest petaled iris ever developed. The 3½-inch falls measure 2 inches at the haft; the standards but little less. So full and voluminous, yet so proportionate and refined in ensemble and so softly colored, that there is no appearance of coarseness or gigantism. Soft aster-blue color, lighter in the center, the substance is remarkable, the branching just right and the sturdy stalk fortunately strong enough to support the weight of the luxuriant flowers. A remarkable and outstanding iris. Picture on page 2 does not do it justice. \$3.00

Iris of the Year Collections

The Association of Iris Growers of America makes an annual selection of five iris which have been thoroughly tested in all regions over a period of years during which time they have been proven exceptionally reliable as well as outstanding in other respects. During the years necessary to thorough-

TRANQUILITY MUTATION (Fay '50) M.38". This beautiful lavender, that should have been white, had us mystified until we saw the evidence of color mutation in the Tranquility plants lined out in our field—some white, some lavender and some with colors mingled, all of the same Tranquility form and all beautiful. TRULY YOURS (Fay '49) L.38". Outstandingly beautiful, the ruffled, lace-edged standards and falls pale out to near white at the extremities from the bright yellow throat. The thickly substanced falls have yellow reverse. Reluctant grower here. Dykes Medal, 1953. Pictured on page 16. \$3.00

ULTRA VIOLET (Buss '55) EM.36". Serenely beautiful, deep violet self of large proportions and perfect form of domed standards and flaring falls. The beard is violet too, and there is no thinning out of the color at the center of the flower. Instead, there is a smooth touch of brown on the hafts that adds to its charm. Broad-petaled and perfectly supported on sturdy, well-branched stalks, this is a "quality" iris. \$7.50

Early Blooming Intermediate Iris

If you have been growing only the tall-bearded varieties of iris, the time will come when you will wish that you could stretch the season out longer. There IS a way to extend the iris season and the way to do it is—BACKWARD.

To really begin at the beginning you should have some dwarf iris, which start to bloom a month or so before the tall-bearded. But our purpose, on this page, is to interest you in the early-blooming intermediates.

The EARLY BLOOMING INTERMEDIATES are, generally speaking, the result of crossing dwarf with tall-bearded varieties and such hybrids are between the two in size, height and blooming season. Their height is between 16 and 28 inches and they have an unusual vivid clearness of coloring, although the color range is much more limited than among the later flowering tall-bearded varieties.

The intermediates are doubly valuable because they bloom at a period when there is a definite lull in the garden. Daffodils and spring-flowering shrubs are through blooming and although tulips bloom at this time, these are not happy everywhere and inclined to die out. Intermediate iris, on the other hand, have rugged constitutions and are generous in the profusion of bloom. The culture is the same as that of the tall-bearded.

As an extra dividend, some of these intermediates bloom again in the fall, if conditions are favorable, which implies that the plants are not allowed to become crowded, that moisture has been sufficient for new growth and that the fall temperatures hold favorable for this second crop of flowers.

Autumn Flowering Iris

Some bearded iris have a tendency to bloom in the fall as well as in the spring. These fall bloomers are doubly welcome because of their rarity even when they are not of technical perfection. It should be realized that the rapid growth necessary for repeat bloom requires that seasons are favorable in length and rainfall and that the plants are uncrowded.

Listed on these two pages are the following irises which often repeat in the fall:

Autumn Elf	Encore
Autumn Haze	Gibson Girl
Autumn Queen	Harvest Blue
Autumn Sunset	October Blaze
Autumn Twilight	Pansy Purple
Bountiful Blue	Sangreal
Dorcas Hutcheson	Southland
Eleanor Roosevelt	White Autumn King

If you would like to obtain the above group of Fall Bloomers, you may have the COLLECTION OF 16 for \$8.00.

Earliest Blooming Dwarf Iris

These low-growing and very early sorts are especially useful for the rock garden or as front edging for the perennial border, where their early brilliance and cheerfulness is so welcome to flower-hungry gardeners.

Dwarfs are, naturally, small plants and although they increase very rapidly, three plants of one variety will give you the massing effect that you want more quickly.

PLEASE NOTE: Spuria iris will be shipped only after mid-August and the minimum acceptable order is \$3.50 unless order includes other plants to be shipped at the same time.

Siberian Iris

Every garden should include a planting of Siberian iris. Blooming at about the same time as the tall bearded varieties, they are so very different that the contrast is most intriguing. They are beardless and have a much different petal formation.

Easy to grow and prodigious of bloom, an established clump often produces fifty or more tall, wiry flower stalks rising out of the mass of narrow-leaved artistic foliage. The flowers have a cool, crisp appearance and keep well when cut.

The newer varieties are taller and finer, the colors cleaner and brighter, and the flowers are larger and of better form than the old, outmoded varieties. The range of colors is limited to various shades of blue and purple, white, and bluish red.

They should be planted in early fall in ordinary garden soil which should not be allowed to dry out until plant is established. They may be grown in full sunlight or in partial shade. Avoid lime and bonemeal because they prefer a slightly acid environment.

The Siberian iris plants we send you are not just single fans but rather, small clumps which have more strength and vigor to insure successful transplanting and earlier increase in your garden.

PLEASE NOTE: We will ship only after mid-August and the minimum acceptable order is \$3.50 unless order is accompanied by other plants to be shipped at the same time.

JAPANESE IRIS

These beardless iris are the most spectacular of all. While they do not have the wide range of color enjoyed by the tall bearded types, their exotic beauty, their tremendous size, accompanied by grace and charm of form plus commanding stature, never fail to elicit exclamations of awe and delight from those who see them for the first time. While they are not difficult to grow, they are, however, more demanding than bearded iris or daylilies. They are adapted to most of the United States, in moist areas in the South and with some winter protection in the North.

Japanese irises will not tolerate lime and their leaves will turn yellow in its presence. They require good soil rich in organic matter such as manure or leaf mold, plus plenty of water during the pre-bloom season. Their blooming time is most opportune, following that of the Bearded, Siberian, Spuria and Louisiana varieties.

Japanese iris are not for impatient gardeners and usually require more time to become established before blooming than the bearded types. Although the plants we furnish are of typically Edenwald quality, which means equal to or better than any that can be obtained elsewhere, we cannot assume responsibility for their cultural success.

PLEASE NOTE: We will ship Japanese iris only in late summer and fall, beginning in August. Minimum order \$3.50 please, or they may be shipped along with other plants at that time.

Daylilies

The hemerocallis, commonly called daylily, is undergoing a period of development that is sure to result in top ranking for this flower as the most popular summer-blooming perennial. We have often termed it the fated flower of the future.

Adaptable to the climate of Maine or California, Canada or Florida, to soil of sand or clay, acid or alkaline, little affected by insects or disease, tolerant of wetness or drought, sun or shade, holding its own against the encroachment of grass or weeds, growing stronger and more beautiful through the years, no other perennial can even approach the cheerful dependability of this remarkable plant.

Waxen, lily-like and mildly fragrant, the flowers range from two to eight inches across, depending upon the variety, with corresponding range in plant stature from less than two feet for foreground planting to over five feet for background.

The name "Hemerocallis" means beautiful for a day, because each day produces a fresh set of blooms, each variety with its characteristic diversity of form, compact or spidery, trumpet-shaped or widely open and recurved, crisply tailored or delightfully frilled, and in colors which range from palest lemon to deepest golden, tan, brown, pink, rose, red, maroon and purple.

This profusion of bloom continues for a solid month, one of the hot summer months at that, and although most varieties bloom in mid-season, selections can be made to provide bloom from iris time till

frost. In our climate and farther south, early varieties often repeat in the fall.

To help you make the wisest choice we have indicated the varieties whose foliage remains green and lush until blasted by winter's cold. These evergreen varieties are best suited to milder climates, being more susceptible to winter damage than are the deciduous types, whose nature is to become dormant upon the approach of winter. Although many of the so-called evergreen varieties can be grown in the north with little difficulty, others are quite tender and all should receive precautionary winter covering.

On the other hand, some deciduous varieties are unsuited to regions where no freezing occurs because a period of complete dormancy is necessary to them. You are advised to select the type adapted to your region for the most part, adding some of the others for experiment. Due to mixed breeding, some varieties are hard to classify exactly.

As with iris, the plants we furnish are freshly dug, strong divisions that will not disappoint. The date of flowering as noted refers to performance in our climate where the common roadside lily, "Fulva Europa" begins to bloom about the middle of June.

PLEASE NOTE: Daylilies listed in this catalog are not shipped until late summer, beginning the first half of August and continuing into November, until checked by the weather. Selections may be made from this catalog for shipment in April, 1959.

PLANTS AS GIFTS

We are always happy to act as the intermediary in filling gift orders. Irises and daylilies are perfect gifts, dependably recurrent reminders of the giver's thoughtfulness and a sure way of "keeping the memory green." WHEN REQUESTED, we send a printed "Gift Announcement" card, stating the donor's name, the occasion and when the plants will be shipped. While it is not practical to time shipments for a given date, we will schedule shipments as nearly as possible in accordance with your wishes if your order is received in time.

PINK SEEDLINGS

In recent years we have made hundreds of pink crosses both among irises and daylilies, and have bloomed a lot of pink seedlings as a result.

The poorer of these have been destroyed, the best saved for observation or further breeding. From this group we hope to finally select a few for introduction.

Those that do not survive this final winnowing will be offered for sale at \$1.00 per plant of our selection. If you are willing to take a chance in thus purchasing "sight-unseen" one or more of these unnamed pink seedlings, we feel sure that you will have no regrets. It's possible that you might even be "tickled pink." Simply write Pink Iris Seedling or Pink Daylily Seedling but be sure to designate whether iris or daylily is wanted.

Price as stated above is \$1.00 each, our selection. No two alike unless you request it.
